*Statistician with experience in biostatistics  
– Medical sciences, genetics, plant physiology, geostatistics –*

## Experience

- Today **Senior R programmer**, *FCA Collin for UCB*, Remote/international team, involved in
- Jan 2021 post-hoc analysis using R, 12 months (ongoing).
- Statistical programming on request.
  - Development of new statistical programming outputs using R: improved graphics, reactive outputs (Shiny), interactive outputs, automated reporting.
  - Propose *analysis as a package*.
  - Support general R coding upskill (e.g. training, code-review).
  - More to come during the year.
- Dec 2020 **Senior R programmer**, *FCA Collin for Roche*, Remote/international team (from Warsaw
- Apr 2020 to San Francisco) following **Agile process**, involved in R package development from design to execution, 9 months.
- Programming R-base suite for statistical analysis of clinical data.
  - From clinical standards STDM/ADaM and analysis to Tables, Listings and Graphs (TLG).
  - R for visualisation: base graphs, ggplot2, code new grid elements, Shiny Apps for interactive applications and dashboards, interactive html/js graphs.
  - R for statistics: function development for standard outputs (e.g. mixed model for repeated measurements, Cox PH regressions, binary response analysis).
  - R in a project: package development with continuous integration and development with Jenkins (CI/CD), git-branching workflow, team convention and good practices for robust code.
  - Large autonomy granted, proactive attitude to create value was encouraged: new ideas, identification of risks/opportunities, generate new designs and prototypes.
- Today **Independent consultant**, *Francois Collin*, Katowice Poland, 16 months (ongoing).
- Jan 2020
- **Expertise** observational studies, real world evidence, study design and statistical analysis plans, biomarker identification, predictive algorithms, publication support, reporting automation.
  - **Portfolio**: <https://fcacollin.github.io/Latarnia>
  - **Recent misc. assignments**:
    - Clinical study - Investigate the relations between bariatric surgery, endocannabinoid systems and diabetes. Scope: SAP and execution for lab test / vital signs data and efficacy evaluation.
    - Clinical study - micro-RNA and diabetes. Scope: SAP for Next Generation Sequencing data and execution covering differential expression, classification, patient profiling, building biomolecular networks and research of genetic candidate biomarkers.
    - Real-World Evidence - Multiple Sclerosis (MS): analysis of public electronic health records for the evaluation of MS therapies in Poland from 2014 to 2018. Two recent developments: the JCV seroconversion for patient receiving natalizumab, the disease progression independent of relapse activity.

Dec 2019 **Human Genetics/Expert in Sciences and Technology**, *the Medical University of Białystok (Poland)*, Centre for bioinformatics and data analysis, 1.5 years.  
 Aug 2018 Research support for data analysis, machine-learning models and publication.  
 ○ **Lung cancer - Next Generation Sequencing (NGS)** for prognosis, **biomarker**, transcriptome for the prediction of type and stage of tumor implemented in an interactive and reactive prototype.  
 ○ **Multiple Sclerosis - Observational study** for post-registration therapy evaluation.  
 ○ **Diabetes - NGS/Clinical study**: research of therapeutic targets via analysis of RNA-seq data.  
 ○ **Teaching**: 8-hour practical for **RNA-seq data analysis**, PhD student co-supervisor.  
 ○ **Pharmacogenomics**: PGx-based contraindication prediction.  
 ○ **Personalised Medicine**: statistics, product development and prototyping for Imagene.me.  
 Jul 2018 **Service Analyst**, *Sopra Steria (Katowice, Poland)*, ITIL working environment.  
 Mar 2018 Analysis/resolution of L1 IT support (general assistance, customer contact).  
 Mar 2014 **R&D Researcher/Stat. modeler**, *Arvalis (Orsay, France)*, 1.5 years.  
 Sept 2012 Improvement of market-leader Farmstar: satellite-image based management of wheat crops.

## Education

Jan 2018 **PhD, Dual Awarded Degree**, *The University of Nottingham/AgroParisTech (UK/France)*, 4 years.  
 Apr 2014 ○ **Statistics**: Tolerance of wheat crops to STB. Study, protocol design, Statistical Analysis Plans.  
 ○ **Project management**: 1 meta-analysis + 3 experiments during 3 years in 2 countries with 3 institutes. Outcome: international conferences, peer-review articles, English-written thesis.  
 Sep 2012 **Master of Applied statistics**, *Agrocampus Ouest (Rennes, France)*, 2 years.  
 Sep 2010 Content: 1.5-year learning program for applied statistics + 6-month graduation internship.

## Skills

Methods **Statistics** from usual inferential techniques to state-of-the-art predictive/machine-learning algorithms, exploratory strategies, structure/unstructured data. **Statistical programming** (10 years experience). Relational **database**. Automated **reports and dashboards**.  
 Code/Soft. ○ Senior programmer: **R, Shiny, rmarkdown, markdown** for statistics, reactive prototypes, automated reporting, reproducible science and R package.  
 ○ Daily user of **git, github** (branching workflow), CI/CD (Jenkins).  
 ○ Good knowledge of **SQL (PostgreSQL), L<sup>A</sup>T<sub>E</sub>X**, bash, html/css, HPC and much more.  
 Languages **Native French; Fluent English; Polish** (in progress).
